- bridge between university and industry
- studying in at least 4 countries
- all teaching in English
- thesis project at a major food company in Europe

By having a group of students of many different nationalities following classes at universities in four countries, an exposure to multicultural environments is emphasized and is part of the learning.

Until 2014 the programme recruited students of 46 different nationalities
10 nationalities among the 22 students who started in August 2013

In the morning of the Friday July 11, 2014 two teams of the 14th edition presented their team project work: "Development of a co-extruded potato based product" and "Plant-based product as an alternative for hard boiled eggs"

We congratulated 20 new alumni of the European Master programme in July 2014. Most of them will join R&D teams in food companies, appr. 50%. Some 12% will take up a function in quality assurance and another 12% will deepen their knowledge and strengthen their research skills in a PhD programme. All around the globe but forever connected in the European Master network.

Emphasised in 2013-2014:

- New in team project: as from 2014: Board-brief proposing a topic area relevant to industry and implementation of Quality Function Deployment method;
- Review of the communication and advertisement strategy for the European Master programme as from 2014-2015;

- "... to align the students' curriculum to needs as seen by us ..."
- "... to combine the learning's at university with practical experience in a global organization. This is the best preparation for the students ..."
